• 1/99, Varukkavilai, Veeyanoor(PO), Kanyakumari - 629177

## EXPERIENCED MEAN STACK DEVELOPER WITH PROFICIENCY IN ANGULAR

Results-driven MEAN stack developer with 1 year of hands-on experience specializing in Angular. Adept at designing and implementing dynamic web applications with a strong focus on user experience and responsive design. Possess a deep understanding of the MEAN (MongoDB, Express.js, Angular, Node.js) stack and a track record of delivering high-quality, efficient code. Strong problem-solving skills combined with a collaborative approach, contributing to seamless teamwork and project success.

## Education

### CARE GROUP OF INSTITUTIONS
Bachelor of Engineering in Mechanical                                                                08/2016 - 03/2020

## Experience

### Comorin Consulting Services                                                                Nagercoil, Kanyakumari

Angular Developer                                                                                10/2022 - 07/2023

- Collaborated with a cross-functional team to develop and enhance client-side applications using Angular, ensuring optimal user experiences and responsive design.
- Successfully implemented RESTful APIs using Express.js and Node.js, facilitating seamless communication between frontend and backend components.
- Utilized MongoDB for efficient data storage and retrieval, enhancing application performance and scalability.
- Contributed to code reviews, identifying potential improvements and ensuring adherence to best practices.
- Actively participated in daily stand-up meetings, providing valuable insights and updates on project progress.
- Familiarity with version control systems, particularly Git, for efficient collaboration.

## Projects

### Hospital Web application                                                                Comorin Consulting Services

                                                                                            01/2023 - 02/2023

Debugging and Development

- Identified and resolved hundreds of bugs within a 10-day timeframe for this project.
- I have actively contributed to various development tasks, including designing and integrating new patient features, creating seamless Login and Logout functionalities, implementing robust form validation, and enabling easy file and photo uploads through drag-and-drop functionality and webcam integration.

# Projects

**Insuranse application**

Manual testing and Integartion testing

- I have performed thorough manual and integration testing, and I've been responsible for developing comprehensive test cases.
- I've also maintained a detailed bug sheet, meticulously documenting identified issues and their corresponding resolutions.

**Bussiness Forum Application**

Development and Debugging

- I have contributed significantly to both debugging and development tasks for this project.
- I successfully rectified integration and page design errors, and I also implemented changes to enhance various features within this application.

**Payment System web application**

Development and Debugging

- I actively contributed by integrating components and debugging issues, ensuring smooth functionality and optimal performance in the project.
- I also optimized responsiveness, adapting the application for various devices and screen sizes.
- I have also been involved in web page development, creating engaging and user-friendly interfaces.

# Strengths

**Communication**

Through active listening and clear articulation, I ensure effective cross-functional collaboration within development teams, translating technical concepts into understandable terms.

**API Integration**

I possess strong proficiency in API integration and have successfully executed numerous CRUD operations on the client side. Additionally, I have been instrumental in designing a variety of APIs for server-side applications using Express.js.

**Debugging**

I successfully debugged more than 120 issues within a span of 10 days for a critical project. In addition, I contributed my debugging expertise to other projects, ensuring timely completion and resolution of issues.

**Web page**

Designed and developed numerous web pages according to provided user experience (UX) guidelines, ensuring optimal responsiveness and consistent performance across various devices.
